

Grow Your Business with

GROWTH PLANNING SIMPLIFIED

Too often, firms put growth on the back burner because planning feels complicated or disconnected from daily work. Growth planning turns that around. In this session, we'll show how to build a roadmap that's inspiring, realistic, and ready for action – one that connects vision to measurable steps and keeps everyone aligned.

Attendees will walk away with:

- A clear understanding of what growth planning is (and isn't).
- Practical definitions of the four growth types and how they apply to AEC firms.
- Tools to align leadership and staff around common goals.
- A framework to turn growth ideas into action with accountability.

"After significant growth, we realized we needed a better way to plan strategically across our five offices. Sarah guided us through vision planning and strategy, helping us see the bigger picture and think beyond immediate needs. With her framework, we built our first-ever 3-year strategy – and the future is bright."

-EMMA PARKER, ROGERS O'BRIEN
